PROFESSIONAL SUMMARY

B.E. Computer Science graduate with hands-on full-stack development experience using the MERN stack, ASP.NET Core, and blockchain technologies. Proficient in Python, Java, JavaScript, React.js, Node.js, SQL, and MongoDB. Built responsive web applications and RESTful APIs through academic projects and an industry internship. Strong problem-solving skills with a passion for delivering high-quality, scalable software solutions.

TECHNICAL SKILLS

Languages: Python, Java, C#

Frontend: HTML, CSS, JavaScript, React

Backend: Node.js, Express.js, RESTful APIs, CRUD

Database: SQL, MongoDB, Supabase

Tools: Git & GitHub, Figma, Vite, Vercel, VS Code, Jenkins, Swagger, Render

Concepts: OOPs, Data Structures, SDLC, Agile.

EXPERIENCE

INTERNSHIP - Neurealm (formerly GS Lab / GAVS Technologies)

Oct 2025 – Nov 2025

- Built an application called **BugTracker** as an internship project to log, assign, and resolve software defects.
- Developed the backend using **ASP.NET Core Web API**, structuring endpoints for **bug creation, assignment, and status updates**.
- Built the front-end interface in **Angular** for testers and developers to view, filter, and update bug records.
- Designed and implemented **RESTful CRUD APIs** integrated with **SQL Server** for persistent data storage, supporting.

PROJECTS

PowerRise - React, Node.js, Express.js, MongoDB, Vite

Feb 2025 – Mar 2025

- Built a Fitness Management Application using the MERN stack (MongoDB, Express.js, React, Node.js) with Vite for the frontend
- Integrated AI features using LLaMA to provide intelligent workout suggestions and fitness guidance
- Developed features to track workouts, manage routines, and monitor fitness progress through a responsive UI
- Created RESTful APIs using Node.js and Express.js with MongoDB for secure and efficient data storage

DigiTraceability - Solidity, Ethereum, React Native, Random Forest, Fast API

Jan 2026-Mar 2026

- A blockchain-based food supply chain tracking system using Solidity, Ethereum (Sepolia testnet), and React Native
- Implemented smart contracts to ensure transparent, tamper-proof recording and verification of food batch transactions from production to distribution
- Built a secure and scalable backend using FastAPI for data handling and system integration
- Integrated Random Forest model for enhanced traceability insights and validation support across the supply chain

Portfolio - Html, Css, Javascript

Sept 2025

- Built a personal portfolio website to showcase projects, skills, and experience in a structured and professional format
- Served as a digital resume to attract recruiters and enable collaboration opportunities

EDUCATION

Loyola-ICAM College of Engineering and Technology

Nov 2022 – Jun 2026

B.E. Computer Science and Engineering, CGPA: 7.4

Relevant Coursework: Database Management Systems, Data Structures & Algorithms, Computer Networks, Operating Systems, Machine Learning.

CERTIFICATIONS

- Database Programming with SQL - Oracle
- Responsive Web Design Certificate - freeCodeCamp
